ABILASH G

Data analyst

abilash1516@gmail.com | +91 72006-61178 | Chennai, India

PROFESSIONAL SUMMARY

AI and Data Science undergraduate skilled in Python, SQL, Machine Learning, and Business Intelligence tools, with hands-on experience from academic projects and a data analytics internship. Proven ability to clean and analyze data, build predictive models, and develop dashboards and KPI reports that turn raw data into actionable businessinsights. Adept at automating data workflows and communicating findingsthrough clear, interactive visualizations. Seeking an entry-level Data Analyst role to apply strong analytical and programming skills in a fast-paced, data-driven environment.

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, Java,R
- **Data Science& ML:** Pandas, NumPy, Scikit-learn, NLP, Predictive Modeling, Statistical Analysis
- **Visualization & BI Tools**: Power BI, Tableau, Matplotlib, Microsoft Excel
- **Core Competencies:** Data Cleaning& Preprocessing, Exploratory Data Analysis (EDA), Dashboard Development, KPI Reporting, Data Automation, Sentiment Analysis

PROFESSIONAL EXPERIENCE

1. TCS iON RIO 125 — SentimentAnalysis Automation Project | *Intern* **June 2026 - Sep 2026**

- Built an end-to-end sentiment analysis pipeline for automating customer feedback classification, applying text preprocessing, tokenization, and TF-IDF feature extraction ahead of deep learning model training.
- Identified and corrected class imbalancein the trainingdata using resampling techniques, improving the model's abilityto generalize across sentiment categories.
- Evaluated and fine-tuned the model using Precision, Recall, and F1-Scoremetrics, iteratively adjustingparameters to improve classification accuracy on unseen feedback data.

2. Null Class | *Data Analyst Intern* **Aug 2025 - Sep 2025**

- Analyzed Google Play Store app and user review data using Python, Pandas, and NumPy, including data cleaning, preprocessing, and feature engineering.
- Built interactive Plotly visualizations and an HTML analytics dashboard covering app ratings, installs, reviews, revenue, and user sentiment.

PROJECTS

1. Easy Analytics — Streamlit-Powered AnalyticsWeb App

- Designed and developed a no-code analytics platformin Streamlit that lets non-technical users upload CSV/Exceldatasets and instantly generate interactive visualizations and summary statistics without writing code.
- Built an automated data cleaning and preprocessing engine using Pandas to handle missing values, data type conversion, and validation checks, significantly improving dataset quality and reducing manual preparation time.

2. AI-Driven VFX Compositing Pipeline

- Developed an AI-powered VFX compositing pipeline integrated with Adobe After Effects to automate video matting, camera tracking, depth estimation, and compositing.
- Integrated MODNet for automated foreground extraction, Structure-from-Motion (SfM) for camera tracking, and Depth Anything V2 for monocular depth estimation and depth-based effects.
- Built the system using Python, PyTorch, OpenCV, and Extended JavaScript/CEP, reducing manual effort in repetitive VFX workflows

3. Power BI Analytics Dashboards

- Designed interactive Power BI dashboards to monitor sales performance, revenue trends, order volume, and customer behavior, consolidating multiple KPIs into a single real-time reporting view.
- Builta social media analyticsdashboard tracking engagement and content performance, and created dynamic,drill-down reports that improved stakeholder decision-making.

EDUCATION

Program	Institution	Score	Year
B.Tech, Artificial Intelligence & Data Science	Panimalar Engineering College, Chennai City Campus	8.74 CGPA	2026
Higher Secondary (XII)	St. Joseph's Higher Secondary School	90.6%	2022

CERTIFICATIONS

- DataAnalysis with R – Coursera
- AWSAcademy Graduate – Cloud Foundations Training Badge
- Data Analytics and Visualization Job Simulation - Accenture
- Journey to Cloud: Envisioning Your Solution - IBM Skill Build
